

BUILDING FOR THE WEB

Yay we made it!

WHAT WE CARE ABOUT (FOR NOW)

Super globals

Query Strings

Forms

```
<?php
$GLOBALS
$_SERVER
$_GET
$_POST
$_FILES
$_REQUEST
$_SESSION
$_ENV
$_COOKIE
?>
```

```
www.example.com/some/path/dudes?foo=bar&fuzz=bazz
```

```
<form action="process.php" method="POST">
  <input type="text">
  <input type="submit" value="Send it off">
</form>
```

LETS BUILD A GUESTBOOK

Use Cases, aka what we'll be working on

- Form that records visitor name, age, physical address, email address, and photo if available
- List all visitors
